Job Information

Job Title:

Quality Tech

Job Description:

Position: Quality Technician

Job Description:

Conduct product or raw material inspections utilizing good quality methodologies. Position would provide manufacturing feedback and verification via product and process inspections. Additionally, would be required to identify risks within current manufacturing processes and determine if training and/or improved work instructions are needed. Work instruction developed in support of manufacturing as necessary.

Job Duties:

1. Conduct product and/or raw material inspections or audits to ensure conformance.
2. Documents non-conformances per red-tag MRB and ensures rejected material has proper disposition.
3. Does sensor calibration testing and maintains records to support certifications.
4. Documents and improves work procedures for identified job tasks and/or areas that are identified as opportunities.
5. Provides manufacturing support for performance metrics generation and report writing.
6. Assists with gage calibration as needed.
7. Completes certificate of conformances and/or other customer required quality documentation
8. Participates in the documentation of CAPA's as needed.
9. Supporting ISO Quality Management System requirements, including internal audits.

Pay Range: \$15-20 per hour
