Job Information

Job Title:

Supplier Quality Engineer

Job Description:

Position: Supplier Quality Engineer (SQE)

Job Description: Obtain the highest level of quality performance of our suppliers through development and monitoring of quality at receiving, production and field performance. Providing Suppliers with regular performance reports for development. Ensure effective corrective and preventive actions are completed by our suppliers. The SQE will also participate in new Supplier and component approvals, plus other quality improvement initiatives. Will ensure assigned actions are effectively implemented and sustained to improve overall supplier performance and product quality.

Job Duties:

- Ensures new component approval process is established and followed, which also includes changes.
- Coordinate and distribute supplier (bi-annual) evaluation process, with improvement plans as determined required.
- Develop strategic receiving and incoming inspection plans that are appropriate and based on; vendor, product, material type, traceability, and level of criticality to the organization.
- Coordinate the verification of critical materials utilizing internal/external testing. Maintain records and/or samples per identified requirements.
- Coordinate all supplier quality documentation records, ensuring accuracy, and accessibility. This includes: Certificate of Compliance, First Articles, and others as determine required.
- Coordinate issuance of all supplier corrective actions, ensuring accuracy and full documentation of the issue identified. This includes;
 - Obtain effective root cause analysis from suppliers utilizing sound quality tools.
 - Ensure supplier containment effort is completed for all supplier quality issues identified.
 - Ensure effective corrective, preventive actions are obtained for any supplier quality issue.
- Coordinate the evaluation and approval of new suppliers, with approval process documentation.
- Conduct on-site supplier audits as deemed necessary and as part of the supplier evaluation process. Limited travel would be required.
- Supports Product and Quality Engineers on customer issues and communication as necessary on supplier quality related issues.
- Serve on project teams to provide QA oversight for new suppliers or new manufacturing processes that impact our suppliers.
- Documents QA procedures via process mapping, as determine required.
- Participates in Quality System maintenance activities, such as CAPA, Internal/External Audits, Complaints, and other activities as needed.
