

WATER WELL SAMPLE RESULTS

– Village of McCullom Lake, May 2006

- Water samples collected by McHenry County Dept. of Health Staff from 9 different locations.
- Sample Dates:
May 2 & 3, 2006
May 22 & 23, 2006
- Analyzed by Independent Certified Private Laboratories
- Tested for 24 Volatile Organic Compounds. VOC's are synthetic chemicals containing carbon that evaporate easily at room temperature (i.e. benzene, formaldehyde).

SAMPLE RESULTS

- No detections at 8 locations
- One detection at one location of *1,1,1,Trichloroethane*
 - 5/2/06 - 1.5 parts per billion
 - Re-sample on 5/23/06 to confirm result - 2.09 parts per billion

CHARACTERISTICS OF *1,1,1,Trichloroethane*

- General solvent, commonly found in products including adhesives, spray paint, lubricants, etc.
- Not known to be carcinogenic
- Maximum Contaminant Level is 200 parts per billion
