PROGRAM OVERVIEW

This will be the second day in a two day workshop that will be focused on providing clinicians with the information and skills they need in order to provide support for individuals with Autism Spectrum Disorder.

PROGRAM OBJECTIVES

Through this workshop series, participants will be able to:

- Describe core strategies common to supporting ASD
- Select critical supports for use in clinical setting
- Incorporate CBT into treatment plans for individuals with ASD
- Developing Behavioral support plans
- Utilizing Visual & Communication systems in varied environments
- Creating environments with ASD in mind
- Supporting generalization of skills
- Setting goals and monitoring progress

PRESENTER

Mr. Morris has over 25 years' experience in offering professional support for individuals and families touched by Autism Spectrum Disorders (ASD). He has worked in both direct service and administrative roles within private and public mental health agencies, special education cooperatives and school districts across the Chicago Metropolitan area. Mr. Morris holds a Master's Degree in Clinical Social Work and has completed numerous advanced degree courses in addition to those required for professional licensure. Since 1990, Mr. Morris has served as a consultant/trainer for Illinois Autism Technical Assistance and Consultation Project, (ITTAP) a multi-agency project providing training in life domain strategies for individuals with Autism and their families. As founder and CEO of Intervention Development LLC, Mr. Morris provides consultation and educational program development for schools, public agencies and families.

TARGET AUDIENCE

Clinicians, social workers, and other mental health professionals
