

Fiscal Year 2008/2009 Budget Highlights and Goals

County Clerk

FY2008 Highlights

- The extension of 2008 taxes, using DevNet software went much better than 07. We still have a few issues, but am confident that they will be addressed.
- We continue to scan and index the marriage licenses on file in this office. As of July we are finishing 1985 and will continue to work backwards.
- The Clerk's office is in the process of meeting with the IT staff, to discuss and plan out the process for scanning and indexing past County Board Records.

FY2009 Goals

- To complete the automation of the tax redemption receipting portion of the DevNet software program.
- We will continue to scan and index marriage licenses. Staff prefers to issue certified copies that can be retrieved electronically, so this encourages us to put as much time into this project as we can.
- The electronic filing and issuance of death certificates should be complete by 2009. This should save the Clerk's office much time and effort.
- To fully implement the scanning and indexing of the County Boards Records.
