

Water Resources Action Plan

www.McHenryH2O.com

WATER IS NECESSARY FOR LIFE, HEALTH, AND ECONOMIC OPPORTUNITY

McHenry County residents are fortunate to have ample water resources including groundwater aquifers and aquatic habitats. However, these water resources are vulnerable and need to be protected or restored so they may continue providing the benefits that we depend on.

You can be part of the solution by joining the Water Resources Action Plan (WRAP) Task Force that will be updating the county's existing plan with the most current data and management strategies. The Task Force meetings are open to anyone with an interest in protecting water resources. Municipalities can also get credit for their NPDES MS4 Permits through participation in the Task Force.

The updated WRAP will be a comprehensive guide designed to educate municipalities, businesses and individuals about water resources, the potential threats to those resources, and Best Management Practices that can protect or restore them.

This is an exciting opportunity to learn from leading experts in the field and to help shape the future of water resource planning and protection in McHenry County.

Visit our website or contact us to learn more about water in McHenry County and how your participation in the WRAP Task Force can make a difference.

If you are not able to make all of the Task Force meetings you are welcome to participate when you can. Check on-line for a list of meeting topics and speakers.

We look forward to seeing you there!!!
